

AZALEAS & RHODODENDRONS CATALOGUE

We try to stock a range all year round, but we find that most of our customers buy when they can see the plants in flower. Our widest selection is therefore available from about March to June. If you require specific varieties we will do our best to obtain them, but it may mean waiting until we can locate them from other suppliers.

E = Evergreen D = Deciduous

AZALEA Requires acid soil. Best in partial shade but will grow in full sun if the roots are cool and moist.
