

## ROSES CATALOGUE

We have a wide range of roses available in containers all year round. From late October /early November to the end of January, we can supply roses bare root. These establish well and are slightly cheaper. If you do not see the variety you require, we may be able to obtain it for you for the bare root season. Please remember that we order our roses in August and September, so please give us as much notice of your requirements as you can. The earlier you let us know the more likely we are to be able to help.

All of our Climbing and Rambling roses are displayed in alphabetical order. Most roses prefer a rich soil in full sun, some are suitable for other positions and are marked as such.. They are also marked to show which group of roses they belong to.

**R** = Rambling **C** = Climbing **Sh** = Shrub  
 \* = Will tolerate light shade. **N** = Will tolerate a North wall.  
**T** - a good tree rose.
